

The ProTrainings Emergency First Aid at Work Level 3 course (EFAW-F) is ideal for most businesses whose risk assessment has identified that there is no requirement for a fully trained first aider for their workplace. This course is available as a ProTrainings CPD certified qualification, all courses are delivered, evaluated and quality assured to meet the new guidelines set out by the HSE in October 2013 and meet the requirements of the First Aid at Work (First Aid) regulations 1981 and subsequent changes.

Also included to comply with the latest HSE and ERC guidelines, are Tourniquets and Haemostatic dressings.

All our first aid courses fully meet the latest UK and European Resuscitation Council Guidelines as per the HSE requirements. ProTrainings Vocational Training Qualifications (VTQ) are fully recognised by the HSE as Trade Body Qualifications.

This version of the EFAW course includes the extra subjects required by the Forestry Commission to include extra subjects covered include severe cuts like chainsaws, crush injuries, Hypothermia and Lyme Disease.

To renew you need to attend another EFAW-F 7-hour course or blended course where the course is completed online and in the classroom.

In May 2016 the HSE and Awarding Organisations announced that computer-based blended training is now allowed for all workplace first aid courses.

You now have the option to complete your Emergency First Aid at Work course as a blended course, with 2 hours of online training followed by 4

hours in the classroom. Our blended training allows you to learn the theory at your pace, one to one with your instructor at a time that suits you.

This blended EFAW course meets all of the requirements of the HSE and Awarding Organisations and is available as a ProTrainings or Regulated Qualification. This qualification is accepted in England, Wales, Scotland and Northern Ireland. It is also accepted in many other countries. Students must be a minimum age is 14 years old.

A modern approach to training, backed up by years of experience providing online, blended and classroom courses. Clear, concise and engaging, when you choose ProTrainings you reduce the cost, not the quality of your training.

Candidates completing our EFAW-F courses receive access to our video library for refreshing skills and reference.

The HSE and Forestry Commission, strongly recommend that all first aiders complete an annual first aid refresher course and [our online course](#) meets this requirement.

The content of this and all our courses has been independently certified as conforming to universally accepted Continuous Professional Development (CPD) guidelines and come with a Certified CPD Statement as well as a ProTrainings Certificate and for online courses an Evidence Based Learning statement.

The person named below has successfully completed
